

Bespoke Fabrication

Custom prefabricated timbers, supplied ready for installation.

Our bespoke range of prefabricated timber products are made in-house by our expert craftsmen to order.

Recycled Timbers utilises CAD to deliver prefabricated solutions, including:

- Benchtops
- Bathroom vanities
- Desktops
- Counters
- Shelves
- Stair treads/risers
- Handrails
- Furniture pieces
- Prefabricated screening, internal and external, supplied ready for install

To add to the environmental credentials of these products, they can be manufactured using high strength flexible Low Volatile Organic Compounds (VOC) adhesive.

All Recycled Timbers' textured finishes (dressed, handbrushed, sawtooth, sawn, and smokey grey) are available in this range, along with popular oil and low-VOC coating options. When recycled timbers are used, the nail/bolt holes are black resin-filled to enhance the timbers' historical characteristics.

For all bespoke fabrication enquiries, please direct your plans/designs to sales@recycledtimbers.com.au for assistance with specifications.
