

# Custom Timber Fabrication

Box beams, posts/feature beams & custom solutions

**The combination of our recycled timber and the latest techniques in timber fabrication has resulted in our new engineered, fabricated feature timbers.**

Scientifically tested to ensure maximum long-term in situ performance, these products are substantially stronger, sturdier, and more resilient than an equivalent solid timber.

They can be manufactured using Low Volatile Organic Compounds (VOC) glue and supplied with a variety of finishes. Options include resin-filled nail/bolt holes that resemble natural timber knots.

Available in fully seasoned large sizes, including premium aged recycled hardwood, they are able to span larger distances, often without the need for additional support.

These timbers are suited to a large variety of commercial and residential applications. The technology employed in its production results in a product that is not only visually appealing, but by its nature, extremely strong, durable, and versatile.

Some common applications, both structural and decorative, include box beams, feature posts/beams, and custom timber solutions.

## Species

- Messmate
- Spotted Gum
- Blackbutt
- Ironbark
- Jarrah
- Tallowwood
