

# Flooring

Custom milled

**Recycled Timbers have a wide selection of custom milled flooring which is produced in-house to world-class processing quality standards.**

All Recycled Timbers' team members are trained in our quality assurance program with an audited in-house training program maintained to world-class standards.

Our timber is precision milled, strip stacked, and air seasoned for a minimum of 12 months. At this point, the timber has reached equilibrium moisture content and stabilised before it is then kiln dried to the Australian standards of 9%-14% moisture content.

Each piece of kiln-dried timber is straight-lined milled, visually graded, and checked so that the moisture content meets the specification.

While we have standard sizes available (widths and thicknesses), all of our timber flooring is run to order, so customising to suit your particular requirements or to match existing flooring is something we can achieve.

## Species

Messmate  
Tallowwood  
Blackbutt  
Spotted Gum  
Grey Ironbark  
Red Ironbark  
Mixed Species

## Standard sizes

80mm x 19mm  
130mm x 19mm  
Other widths available

## Overlay

80mm x 12mm  
130mm x 12mm
