

Posts

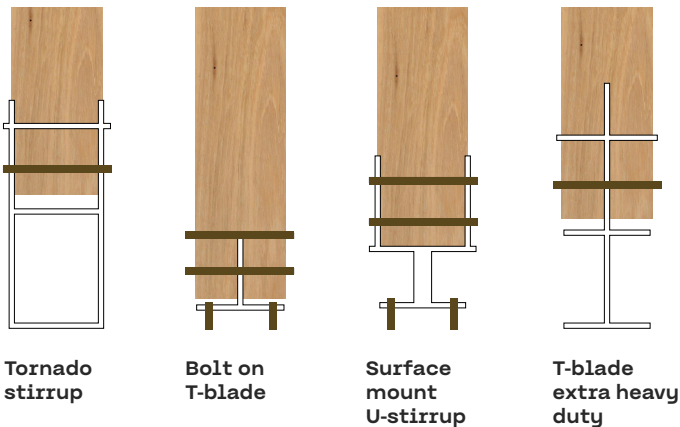

Green, lean, and supreme

Massive posts and beams.

Massive and magnificent, Recycled Timbers' range of premium aged post and beam timbers adds warmth and charm to any structure.

These old timbers have immense structural integrity. They can either be left in their original rustic and rugged form or handbrushed to reveal the patina that generations of prior use have enriched.

Post supports are available, and Recycled Timbers can pre-drill and slot your posts to suit the supports for easy installation on site.

Some suggested installation methods for post supports above.

Installation must be in accordance with local council building regulations and engineering specifications.
